

Our Immune System

Our immune system is a complex network of specialized organs, glands and cells.

Immunity, by definition, is a homeostatic condition in which the body maintains itself. It is a series of balanced, complex, multi-cellular and physiological mechanisms that allow an individual to distinguish foreign material from "self" and to neutralize and/or eliminate the foreign matter.

***LOOK BETTER,
FEEL BETTER,
MAINTAIN A HEALTHY BODY AND
A HIGH ENERGY LEVEL!!!!***

Unfortunately diet, stress, drugs, environmental toxins and smoking are just some of the ways our immune system may be weakened. We must have an optimum immune response.

Sea Cucumber

Sea cucumber is the main ingredient of **TBL-12**. It is a prized food, particularly in Asian markets. Sea cucumbers are not actually cucumbers, but are marine animals, related to starfish and sea urchins. They are known to have anti-aging agents and are strong anti-oxidants.*

In its prepared form, as a food, sea cucumber is known as *trepang* or *bêche-de-mer* throughout Asia. Through much of the nineteenth century, the animal was the basis of a major export industry across northern Australia.

They are found in all oceans, mostly in warm shallow waters, but sometimes at great depths. However, the sea cucumber in **TBL-12** comes from Australia's Great Barrier Reef.

Sea cucumber is beneficial for anti-aging and for persons needing an energy "boost". *

Finally, sea cucumbers provide vitamins A, B1(thiamine), B2(riboflavin) and B3(niacin), and C as well as the minerals calcium, iron, magnesium and potassium.

TBL-12

Dietary Supplement is a gel concentrate which is packed in 20ml jars and then distributed in a box of 56 units which is kept frozen, and thawed out just prior to use. The product is taken orally, twice daily by customers, generally in the morning, or once in the morning and once at night.

TBL-12 is warehoused in special freezer facilities in Australia, Connecticut and California in order to guarantee the quickest possible delivery times. Other facilities are being organized for Europe in order to speed up the service in that area.

This unique product which is harvested from the seas off the Great Barrier Reef is produced from selected species of sea cucumber and sea grasses. Over the centuries the Chinese learned to make their own medicine from the sea and the product we call **TBL-12** is based on some of the same scientific principles.

Western science has only recently begun to understand the significance of marine invertebrate and the importance they can play in helping us maintain a healthy body.

Our own processing procedure gives **TBL-12** its unique ANTI-AGING PROPERTIES.*

TBL-12 holds promise as a nutrient supplement for people having low energy and experiencing the normal effects of aging.*

Sea cucumber is a prized food, particularly in Asian markets, where it fetches good prices - but not for use in salads! Instead it is sold in a smoked, dried form and is sought after for use in soups.

Sea Plants have been widely used in Chinese Herbal Medicine. Shark Fin Soup is a well-known Chinese delicacy that has been prized for hundreds of years by the Chinese. This dish is believed to enhance the body's immune system and restore virility.*

Sea Cucumber, Sea Sponges, Sea Plants and other Marine products have been used by the Chinese who believe that the oceans hold many of the answers to man's health, well-being and longevity.*
